

SUBSTANCES OF VERY HIGH CONCERN

REACH / SVHC Compliance Policy

Sensor Detection evaluates and declares compliance with the EU REACH Regulation (EC 1907/2006). Our compliance position is based on documented evidence provided by our component suppliers — REACH declarations, SVHC statements and material disclosures.

HOW WE DECLARE COMPLIANCE

- We declare the exact REACH Candidate List version applicable to the parts contained in each product.
- Because a finished product contains multiple components, the product's declared REACH version equals the earliest (lowest) REACH version of any component used — so compliance is never overstated.
- Products can be re-assessed against newer releases of the REACH regulations on request.

WORKED EXAMPLE

19 components conform to REACH 251 (Candidate List published 5 November 2025).

1 component conforms only to REACH 241 (Candidate List published 27 June 2024).

The complete product is declared as REACH 241 compliant.

CUSTOMER REQUESTS

Customers may request REACH compliance information for specific products, and updates where certification to a newer release of the regulation is required.
